REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

It is well known in the art to vapor phase aluminum on a metal substrate such as a gas turbine foil coated with diffusion aluminide by using a halide activator or aluminum halide as noted in Wheat (6,863,925). However, the prior art references fail to teach the appropriate flow rates and times as well as forming a diffusion aluminide coating on an uncoated portion of an internal surface of a substrate, which also contains a coated external surface, without interdiffusing a sufficient amount of aluminum into the coating layer to adversely affect the coating growth potential or mechanical properties.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
